MINI REVIEW

THOMAS, R., Regulatory Networks Seen as Asynchronous Automata: A Logical Description	1
MUTHUSAMY, R. and PONNUSWAMY, P. K., The Influence of Side Chain Structures on the Residue-Residue Associations in Globular Proteins	25
DŽAKULA, Z. and ANDJUS, R. K., Biophysical Models of Protein Denaturation. I. An Improvement of the Model of Two States	41
DŽAKULA, Z., ANDJUS, R. K. and BOŽIĆ, M., Biophysical Models of Protein Denaturation. II. Effects of Denaturants and of pH	61
HORKOVICS-KOVATS, S. and TRAUB, P., A Mathematical Model for Protein-induced Lipid Vesicle Leakage: Interaction of the Intermediate Filament Protein Vimentin and Its Isolated N-terminus with Phosphatidylinositol Vesicles	89
NUSSINOV, R. and SMYTHERS, G., Trends in the 5' vs. 3' Flanks of Oligonucleotides in Eukaryotic and Prokaryotic Genomes: The Asymmetric Roles Played by Cytosine and Guanine	111

LETTERS TO THE EDITOR

HEMELRIJK, C. K., Interchange of "Altruistic" Acts as an Epiphenomenon	137
SEYFARTH, R. M., Reciprocal Altruism and the Limits of Correlational Analysis	141

Number 2, 21 November 1991

BESPALOVA, S. V. and TOLPYGO, K. B., Excited Hydrogen Bonds in the Molecular Mechanism of Muscle Contraction	145
KIMMEL, M. and AXELROD, D. E., Unequal Cell Division, Growth Regulation and Colony Size of Mammalian Cells: A Mathematical Model and Analysis of Experimental Data	157
KO, M. S. H., A Stochastic Model for Gene Induction	181

BROWN, G. C., Total Cell Protein Concentration as an Evolutionary Constraint on the Metabolic Control Distribution in Cells	195
YEE, E., Reconstruction of the Antibody Affinity Distribution from Experimental Binding Data by a Minimum Cross-entropy Procedure	205
CHAO, L., Levels of Selection, Evolution of Sex in RNA Viruses, and the Origin of Life	229
FRANCE, J., SIDDONS, R. C. and DHANOA, M. S., Adaptation of Compartmental Schemes for Interpreting Isotope Dilution Data on Volatile Fatty Acid Metabolism in the Rumen to the Non-steady State and for Single-dose Injection	247
KAHN, D. and WESTERHOFF, H. V., Control Theory of Regulatory Cascades	255

Number 3, 7 December 1991

TANEMURA, M., HONDA, H. and YOSHIDA, A., Distribution of Differentiated Cells in a Cell Sheet Under the Lateral Inhibition Rule of Differentiation	287
HOCHBERG, M. E., Non-linear Transmission Rates and the Dynamics of Infectious Disease	301
BREDEN, F. and WADE, M. J., "Runaway" Social Evolution: Reinforcing Selection for Inbreeding and Altruism	323
NG, Y.-K., The Paradox of the Adventurous Young and the Cautious Old: Natural Selection vs. Rational Calculation	339
CLEARWATER, S. H., A Model of Morphogenesis for Protein Secondary Structures	353
ANTIA, R., LEVIN, B. and WILLIAMSON, P., A Quantitative Model Suggests Immune Memory Involves the Colocalization of B and Th Cells	371
WINZOR, D. J., AGAPOW, P.-M. and JACKSON, C. M., Preferential Ligand Binding to Multi-state Acceptor Systems: Comparisons of the Calcium-binding and Dimerization Characteristics of Prothrombin and Fragment 1	385
DANI, J. A. and FOX, J. A., Examination of Subconductance Levels arising from a Single Ion Channel	401
STEELE, J. H., Can Ecological Theory Cross the Land-Sea Boundary?	425

LETTERS TO THE EDITOR

CORNISH-BOWDEN, A., Parameter Estimating Procedures for the Michaelis-Menten Model: Reply to Tseng and Hsu	437
SHEN, J., On Partitioning the Opportunity for Sexual Selection	441

Number 4, 21 December 1991

JARCHAU, TH. and VOGT, H., The Distribution of Restriction Fragment Lengths for Non-overlapping Restriction Sites in a Random DNA Sequence Model	445
DERRICK, W. and METZGAR, L., Dynamics of Lotka-Volterra Systems with Exploitation	455
COURTOIS, P.-J. and HEYMANS, F., A Simulation of the Construction Process of a Termite Nest	469
STEWART, J. and VARELA, F. J., Morphogenesis in Shape-space. Elementary Meta-dynamics in a Model of the Immune Network	477
O'NEILL, M. C., A General Method for Modeling Cell Populations Undergoing $G_1 \rightarrow G_0$ Transitions during Development	499
STEIN, W. D., Rate-limiting steps in Carcinogenesis and Their Bearing on the Incidence/Age Data for Cutaneous Melanoma and Hepatocellular Carcinoma	519
HAIG, D. and GRAFEN, A., Genetic Scrambling as a Defence Against Meiotic Drive	531
CARACO, T. and GIRALDEAU, L.-A., Social Foraging: Producing and Scroung- ing in a Stochastic Environment	559
FIELDS, G. B., A Model for Interstitial Collagen Catabolism by Mammalian Collagenases	585
ERRATUM	603

Index to Volume 153

- AGAPOW, P.-M. (see WINZOR, D. J.), 385
- Altruism, reciprocal, and the limits of correlational analysis (letter), 141
- Altruism, reinforcing selection for inbreeding and; "runaway" social evolution, 323
- "Altruistic acts", interchange of, as an epiphenomenon (letter), 137
- ANDJUS, R. K. (see DŽAKULA, Z.), 41, 61
- ANTIA, R., LEVIN, B. and WILLIAMSON, P., A quantitative model suggests immune memory involves the colocalization of B and Th cells, 371
- Antibody affinity distribution: reconstruction from experimental binding data by a minimum cross-entropy procedure, 205
- Automata, asynchronous, regulatory networks seen as; a logical description, 1
- AXELROD, D. E. (see KIMMEL, M.), 157
- B and Th cells, a quantitative model suggests immune memory involves the colocalization of, 371
- BESPALOVA, S. V. and TOLPYGO, K. B., Excited hydrogen bonds in the molecular mechanism of muscle contraction, 145
- Biophysical models of protein denaturation, 41, 61
- BREDEN, F. and WADE, M. J., "Runaway" social evolution: reinforcing selection for inbreeding and altruism, 323
- BROWN, G. C., Total cell protein concentration as an evolutionary constraint on the metabolic control distribution in cells, 195
- Calcium-binding and dimerization characteristics of prothrombin and fragment 1, comparisons of, 385
- CARACO, T. and GIRALDEAU, L.-A., Social foraging: producing and scrounging in a stochastic environment, 559
- Carcinogenesis, rate-limiting steps in; incidence/age data for cutaneous melanoma and hepatocellular carcinoma, 519
- Carcinoma, hepatocellular; incidence/age data and rate-limiting steps in carcinogenesis, 519
- Catabolism, collagen, interstitial, by mammalian collagenases; a model, 585
- Cells, differentiated; distribution in a cell sheet under the lateral inhibition rule of differentiation, 287
- Cell division, unequal, growth regulation and colony size of mammalian cells; a mathematical model and analysis of experimental data, 157
- Cell populations undergoing $G_1 \rightarrow G_0$ transitions during development; a general method for modeling, 499
- Cells: total cell protein concentration as an evolutionary constraint on the metabolic control distribution, 195
- Channel, ion, single, examination of subconductance levels arising from, 401
- CHAO, L., Levels of selection, evolution of sex in RNA viruses, and the origin of life, 229
- CLEARWATER, S. H., A model of morphogenesis for protein secondary structures, 353
- Collagen catabolism, interstitial, by mammalian collagenases; a model, 585
- Colocalization of B and Th cells, and immune memory; a quantitative model, 371
- Construction process of a termite nest, a simulation, 469
- Control theory of regulatory cascades, 255
- CORNISH-BOWDEN, A., Parameter estimating procedures for the Michaelis-Menten model: reply to Tseng and Hsu (letter), 437
- Correlational analysis limits, and reciprocal altruism (letter), 141

- COURTOIS, P.-J. and HEYMANS, F., A simulation of the construction process of a termite nest, 469
- Cross-entropy procedure in reconstruction of the antibody affinity distribution from experimental binding data, 205
- Cytosine and trends in the 5' vs. 3' flanks of oligonucleotides in eukaryotic and prokaryotic genomes, 111
- DANI, J. A. and FOX, J. A., Examination of subconductance levels arising from a single ion channel, 401
- Defence against meiotic drive, genetic scrambling as, 531
- Denaturation, protein, biophysical models of, 41, 61
- DERRICK, W. and METZGAR, L., Dynamics of Lotka-Volterra systems with exploitation, 455
- Development, a general method for modeling cell populations undergoing $G_1 \rightarrow G_0$ transitions during, 499
- DHANDA, M. S. (see FRANCE, J.), 247
- Differentiated cells: distribution in a cell sheet under the lateral inhibition rule of differentiation, 287
- Dimerization and calcium-binding characteristics of prothrombin and fragment 1, comparisons of, 385
- DNA sequence model, the distribution of restriction fragment lengths for non-overlapping restriction sites in, 445
- Dynamics of infectious diseases, and non-linear transmission rates, 301
- Dynamics of Lotka-Volterra systems with exploitation, 455
- DŽAKULA, Z. and ANDJUS, R. K., Biophysical models of protein denaturation. I. An improvement of the model of two states, 41
- DŽAKULA, Z., ANDJUS, R. K. and ROŽIĆ, M., Biophysical models of protein denaturation. II. Effects of denaturants and of pH, 61
- Ecological theory: can it cross the land-sea boundary?, 425
- Epiphenomenon, interchange of "altruistic" acts as an (letter), 137
- Erratum, 603
- Evolution of sex in RNA viruses, and the origin of life, 229
- Evolution, social, "runaway"; reinforcing selection for inbreeding and altruism, 323
- Evolutionary constraint of total cell protein concentration on the metabolic control distribution in cells, 195
- Exploitation, dynamics of Lotka-Volterra systems with, 455
- Fatty acid metabolism in the rumen; interpretation of isotope dilution data, 247
- FIELDS, G. B., A model for interstitial collagen catabolism by mammalian collagenases, 585
- Foraging, social; producing and scrounging in a stochastic environment, 559
- FOX, J. A. (see DANI, J. A.), 401
- Fragment 1, comparisons of the calcium-binding and dimerization characteristics of prothrombin and, 385
- FRANCE, J., SIDDONS, R. C. and DHANDA, M. S., Adaptation of compartmental schemes for interpreting isotope dilution data on volatile fatty acid metabolism in the rumen to the non-steady state and for single-dose injection, 247
